OSHA Deadline for Hazard Communication Training—12/1/13

Do your *non-laboratory* employees work with cleaners, solvents, pesticides or other chemicals? Have they received the updated *Hazard Communication—Right to Understand* training required by OSHA? **The December 1, 2013 deadline to ensure OSHA training compliance is fast approaching...**

Radiation Safety Training

If you are new to UConn or returning to campus and will be working in a lab that uses radioactive materials, or you will be working directly with lasers or x-ray producing equipment, there are required training programs that need to be completed prior to working in those labs.

Employee Safety Orientation

Information for Supervisors & Principal Investigators. If you supervise UConn faculty, staff or student employees, be sure to complete and review an **Employee Safety Orientation Form** with each of your new or transferred employees...

Jonathan the Ergonomic Husky

Jonathan got some ergonomic tips about Workstation Wellness at the *UConn Work/Life Expo*. You can too! Contact EHS to arrange for an Ergonomic Evaluation or sign up for a workshop.
